ANU METHODS INVOLVED		
1. (5/WEIGHTM:/WOTCH) "Operation Condor" is the code name given for intelligence collection on "leftists," Gommunists and Merrists in the Southern Cone Area. It was recently established between cooperating intelligence services in South America in order to eliminate Markist terrorist socialists in member countries with Chile reportedly being the center of operations. Other participating members include: Argentine, Faraguay. Oruguay and Solivia. In addition, Brazil has apparently tentatively agreed to provide intelligence input for Operation Condor. Members showing the most enthusiasm to date have been Argentine, Uruguay and Chile. These three countries have angaged in joint operations, primarily in Argentine, against terrorists targets. During the weak of 20 Reptember 1976, the Director of the Argentine Army Intelligence Service travaled to Sentiago to consult with

his Chilean counterparts on Operation Condor (This travel is similar to trip reported in IR 6 804 0309 76.)

2. (0. AMERICAL AUDIOUS) During the period 24-27 September 1976, members of the Argentine State Secretarist for Information (SIDE), operating with officers of the Urugusyan Military Intelligence Service carried out operations against the Urugusyan Terrorist organization, the OFR-33 in Buenos Aires. As a result of this Urugusyan Terrorist organization, the OFR-33 in Buenos Aires. As a result of this joint operation, SIDE officials claimed that the entire OFR-33 infrastructure in Argentina has been eliminated. A large volume of US currency was seized during the combined operation.

3. (CANTINET /MANAGED). A third and reportedly very secret phase of "Operation Condor" involves the formation of spacial teams from member countries who are to carry out operations to include assessinations against terrorist or supporters of terrorist organizations. For example, should a terrorist or a supporter of a terrorist organization from a member country be identified, a special team would be dispatched to locate and surveil the target. When the location and surveillance operation has terminated, a second team would be dispatched to carry surveillance operation has terminated, a second team would be issued false out an operation against the target. Special teams would be issued false documentation from member countries, bould be composed either of individuals from one member ration or of persons from various number nations. Source stated that team members would not be commissioned or con-commissioned officers of the armed forces, but rather "special agents." Two European countries, specifically mentioned for possible operations under the third phase were France and Fortugal.

4. (c/warment/Horona) A special team has apparently been organized in Argentina for use in betate Condor." They are members of the Argentine Army Intelligence Service and the State Secretariat for Information. They are reportedly structured such like a US Special Forces Team with a medic (doctor), demolition expert, etc... They are apparently being prepared for action in phase three.

COMMENT: (CAMPINEL (MANOREL) More and more is being heard about Operation Condor" in the southern cope. Hilitary officers who, heretofore, had been mum on the subject have begun to talk openly about it. A favorite remark is that, "one of their colleagues is out of country because he is flying like a condor."
