RELEASED IN FULL

SECRET

Day two of our exciting Thar Desert watch...

No significant activity occurred over the weekend. The cable at drill site 2 was rearranged into shorter lengths (similar to how the US, Russkies, and China do/did it). Two parallel lengths of cable were seen and appear to be connected by a thin strand of cable. Oddly, while the activity with the cable is at site 2, all the personnel activity appears to be at site 3. (S)
