

**George Washington University Clinical Psychology Ph.D. Program  
Faculty Preference Ranking  
Admissions for 2024-2025 Academic Year**

The Ph.D. program in Clinical Psychology at the George Washington University follows a mentorship model. Our program selects qualified applicants whose interests fit closely with the overall goals of the program, and with the research interests of specific faculty members. We request that you review the list of faculty below, and rank order up to two faculty members whose research interests best match your current research interests (1 = first choice, 2 = second choice). We will use your faculty rankings to identify potential faculty mentors.

Please indicate the faculty members you have selected on the online application for the Ph.D. program in Clinical Psychology. To aid you in your rankings, more detailed information about each faculty member is provided at the GW Psychology Department website: <https://psychology.columbian.gwu.edu/people>

*Please note that this form only includes faculty who will be available to mentor new students in the 2024-2025 academic year. Drs. Howe, Molock, and Zea are no longer taking students currently nor in future years.*

**Sarah Calabrese**
