New Traffic Pattern

For those of you attending the New Horizon Research Conference that have not recently been to our campus, there are a few traffic pattern changes you should be aware of.

The lights on Research and Presidential drives no longer exist. They have been replaced by an overpass. When traveling on Rt. 7 you will now take the ramp that says Loudoun County Parkway, and go North. At the end of the ramp you will be facing the new Spring Hill Suites. Turn right, and as you come around the corner the first building on the left is GWU, our original building in Ashburn, and where the conference is located. The address is 20101 Academic Way.
